

Retail Shelf Planner – Color Codes

Assigning Colors

In Retail Shelf Planner you can assign a color to an object (Section, Shelf, Product) by clicking on the small button next to the color box in the dialogs.

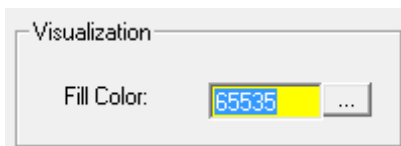

This is quick and easy if for the Section and the Shelves as it's a limited number only. For the occasional Product it's fine as well, but it's not really efficient when you're building or maintaining a product database with hundreds if not thousands of products. That is better done in Excel, but there you don't have the "color-button" like in Retail Shelf Planner.

The color-dialog gives you access to 16 million colors.

Color Codes

Retail Shelf Planner uses the color codes from the Windows palette. After you've picked a color from the color-dialog, it not only colors the background of the box next to the button, it also puts the color code in the box. You can double click it to select all numbers and copy and paste it into another application.

It's this number that you enter in the FillColor column in the Excel spreadsheet that holds your database.

ID	UPC	Name	Supplier	Category	SubCateg	Desc1	Desc2	Desc3	Desc4	Desc5	Data1	Data2	Data3	Data4	Data5	Height	Width	Depth	FillColor	UnitsPerC	Price	Cost	Tax	Sales
